## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7, 26, and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following issues must be corrected:

a) Claim 1 recites that the second seal means is “arranged and positioned to provide a seal between said non-rotating structure and the first seal land positioned in a lower pressure zone”. From this, it is unclear which one of the first seal land (48 or 50) and the second seal means (68) is positioned in a lower pressure zone. Examiner believes the second seal means are being referred to with this limitation. However, the second seal means (64, 66, 68) appear to only be *exposed to* rather than positioned in a lower pressure zone.

b) It is unclear from claim 1 if the “lower pressure zone” is the same as the “low pressure zone” and “second chamber” described on pages 5 and 6 of the specification, and also claimed in claim 1. All terminology in the claims should be consistent with the terminology in the specification, and within the claims.

c) Claim 1 recites that a portion of the connecting means, one of the first and second seal lands, and the non-rotating structure, define a first chamber. The specification describes the first chamber as a high pressure zone 60 (pages 5, line 30, to page 6 line 5). However, from figure 2, it appears as though the first chamber, or high pressure zone 60, is defined by second seal means

Art Unit: 3676

64, 66, 68, the non-rotating structure 52, and one of the magnetic rings, or seal lands 50. It appears the connecting means 54 is not exposed to the high-pressure zone/first chamber 60.

Examiner notes that figure 2 is the only figure that pertains to the elected species.

d) Claim 1 recites "the second chamber" in the second line of the second paragraph. This should be changed to --a second chamber--, as such a chamber has not been previously provided in the claims.

3. Claims 2-7, 26, and 27, depend from rejected claim 1 and include all of the limitations of claim 1. Therefore, these claims are also rejected.

#### ***Allowable Subject Matter***

4. Indication of allowable subject matter is being withheld until the 112 2<sup>nd</sup> paragraph rejections above are overcome.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection. Claim 1 is now rejected under 35 U.S.C. 112 2<sup>nd</sup> paragraph for discrepancies and inconsistencies with the specification and drawings. It is also noted that the status of claims 8-25 is listed improperly. While the examiner appreciates the clarifying remarks by applicant's representative, the status of these claims should be presented simply as "Claims 8-25 (Canceled)", to conform with the practices of the U.S. Patent and Trademark Office.
